About This Game

Airmen is a first person shooter where players build and battle their own custom airships. Start with an empty hangar and build a steampunk airship piece by piece. Crew you airship solo or alongside friends on dangerous expeditions into the Archipelago. Fill your cargo hold with wood, aetherium, magnesite and more to upgrade your ship. Mine resources or raid the cargo holds of other players or AI air forts. Take the wheel, mount the turrets, grab an axe for boarding action, or try to stay airborne using a repair hammer but beware: every component of your airship can be destroyed so be sure to extract in one piece.

I love boarding ships. This is probably the best steampunk airship game out there. some people say that its dead, but its a growing game just not a whole lot of people know about and you can still find people playing to explore with. most of the people who play the gameplay is easy to get used to and the size of the main gamemode's map is perfect. you can make any ship you want, from a tiny speedster, to a cargo carrier or a massive warship you can make anything. the dev works hard to bring weekly updates and bug fixes. the only thing I dont like about this game is how hard the cosmetics are to earn, but its not too bad. 9.999/10. This is a lovingly-crafted niche title that brings back all of the best memories of games like Air Buccaneers. The small, albeit dedicated community is steadily growing and I've encountered very few toxic cretins in my time with the game. The only complaint I have is about the lack of a dedicated deathmatch mode for airship combat without the downtime. All in all this is an incredible game and well worth your money.
